

Bridging Boundaries

EMPOWERING SRHE THROUGH KAFETEEN PEER EDUCATORS

Dr. Wan Nur Baiti Sudin (MD, MPH)

KafeTEEN Program Coordinator, NPFDB Malaysia

01 - BACKGROUND

In 2023, it is estimated 8.4 million of Malaysia population consists of **Young People** age 10 to 24 years old, which accounts for 25% of the country's total population of 33.3 million.

Issue: Increase in sexual activity prevalence among youth.

Prevalence of premarital sexual activity among youth in Malaysia, 1994 - 2022

Issue: High risk practice among youth who engaged in sexual activity.

01 - BACKGROUND

- SRHE knowledge is KNOWN to be one of protective factors in preventing youth from engaging in high risk sexual activity.
- However, knowledge of Malaysian youth regarding SRH and HIV prevention is still lacking.

* Inadequate HIV knowledge an incorrect answer to any 1 of the 5 questions based on the United Nations General Assembly Special Session (UNGASS) indicators

Inadequate HIV knowledge among youth:

A girl can become pregnant the first time she has sexual intercourse A girl may become pregnant even though her partner ejaculates outside the vagina during sex Use of condoms may prevent sexually transmitted diseases 13-17 YEARS YEARS 32.5% 35.2% 17.7% 17.8% 17.8% 28.6% 39.9%
